Director's Office

May 6, 1999

Hendrik Weerts
Michigan State University
Department of Physics & Astronomy
East Lansing Michigan 48824

Dear Harry,

The DZero Project, as part of the Tevatron Collider Run II program, shares the Laboratory's highest priority with CDF and the Beams Division Run II effort. At this time it is necessary to change the management structure of the DZero Project in order to ensure continuing strong and capable leadership required to successfully complete the project. The DZero collaboration, represented by their spokespersons, Hugh Montgomery and you, has recommended that you become a Co-Project manager along with Mike Tuts.

I have enthusiastically accepted this recommendation and ask that you agree to take on these additional responsibilities. The Laboratory shares the collaboration's confidence in your abilities to provide the leadership so necessary to bring the DZero Project to completion next spring for the initiation of Run II. We are all committed to having two complete, complementary collider detectors to explore the new mass region which will be opened with over 2 fb^{-1} of data.

I wish you the best in this new appointment and commit to making every possible effort to work with you, Mike and the collaboration to bring success to DZero.

Sincerely,

K. C. Stanfield
